INDEX TO VOLUME 35

Ability, The, of rhizobia isolated from nodules of wild leguminosae to fix nitrogen in symbiosis with various host plants. Abstract. (No abstract) 205
Acetyl-methyl-carbinol, The fermentation of, by the *Escherichia-Aerobacter* group and its significance in the Voges-Proskauer reaction..... 157
Actinomycetes, The "tyrosinase reaction" of the..... 415
Action, The, of bacterial toxins on the tissues of cold-blooded animals. Abstract..... 338
Action, The, of chemical and physical agents on *Clostridium welchii* and its toxin. Abstract..... 14
Action, The, of intestinal bacteria on ascorbic acid (Vitamin C). Abstract.. 340
Age susceptibility in Johne's disease. Abstract. (No abstract)..... 203
Agglutination, The test for detecting *Salmonella pullorum* infection in chicks. Abstract..... 62
American, The, Type Culture Collection..... 334
Anaerobes, The influence of vitamin C on the growth of, in the presence of air, with special reference to the relative significance of Eh and O_2 in the growth of anaerobes..... 141
Anaerobiosis, Studies on. I. The nature of the inhibition of growth of cyanide treated *E. coli* by reversible oxidation-reduction systems..... 455
Analysis of a crude polyvalent bacteriophage by specific absorption and plaque purification. Abstract..... 47
Andersen, A. A. and Werkman, C. H. d-Lactic acid fermentation. Abstract 69
Anderson, John F., Holm, August and Leonard, George F. A modified Rivers' culture medium for vaccine virus. Abstract..... 41
Animal species, The characteristics of antipneumococcus sera produced by various..... 207
Antigenic, The, and synergistic action of a toxic serum extract of hemolytic streptococci. Abstract..... 15
Antigenic, The, qualities of vaccinia virus. Abstract..... 25
Antigenic variants of *Brucella*, The detection of, by means of an opsonocytophagic test..... 255
Antigenicity of the Friedländer group. Abstract..... 24
Antigenicity, with especial reference to infectious agents. Abstract..... 22
Antipneumococcus sera, The characteristics of, produced by various animal species..... 207
Apparatus, An, for desiccating stock cultures. Abstract..... 5
Application, The, of sintered (fritted) glass filters to bacteriological work. Abstract..... 199
Attempts to assay the enterotoxic substance produced by staphylococci by parenteral injection of monkeys and kittens. Abstract..... 52
Atypical typhoid fever caused by atypical strains of *Eberthella*. Abstract.. 56
Azotobacter, Physical characteristics of cells of, *Rhizobium*, and *Saccharomyces* 501

Bacillary dysentery in the monkey. Abstract 57
Bacillus bronchisepticus, Bacillus para pertussis: A group of cultures resembling both *Bacillus pertussis* and, but identical with neither 561
Bacillus para pertussis: A group of cultures resembling both *Bacillus pertussis* and *Bacillus bronchisepticus* but identical with neither 561
Bacillus pertussis and *Bacillus bronchisepticus, Bacillus para pertussis:* A group of cultures resembling both, but identical with neither 561
Bacillus sp., Mitosis-like activity in. A preliminary report 347
Bacteria, Colony organization of certain, with reference to sporulation 261
Bacteria, Decomposition of nitrogenous substances in sea water by 477
Bacteria, lake, Seasonal fluctuations of, in relation to plankton production. Studies of freshwater bacteria. IV 129
Bacteria, Light as a factor in the production of pigment by certain 625
Bacteria suspended in air, A quantitative method of determining the lethal effect of ultraviolet light on 589
Bacteria using indol in a trickling filter. Abstract 58
Bacterial cultures, The preservation of. I 163
Bacterial metabolism, The "resting cell" technique as a method for study of. Respiratory enzyme systems in symbiotic nitrogen fixation. I 601
Bactericidal, The, effect of sulfanilamide on the gonococcus in vitro. Abstract 36
Bactericidal, The, value of the sterilamp. Abstract 4
Bacteriologic studies of viruses by a new method. Abstract 46
Bacteriological, A, study of the bulk fermentation of cigar leaf tobacco. Abstract 71
Bacteriological, A, study of raw cane sugar plants. Abstract 74
Bacteriological and chemical methods. Metabolism of pathogenic bacteria. I 527
Bacteriological aspects of the cheese industry. Abstract. (No abstract) .. 453
Bacteriological, cytological, zymological and chemical studies of the cause of cucumber pickle spoilage. Abstract 73
Bacteriological findings in a case of human infection from a human bite. Abstract 203
Bacteriological investigations of the Patuxent River and Chesapeake Bay. Abstract 61
Bacteriological studies on rheumatic fever cases (680 cases). Abstract ... 642
Bacteriology, The, of cheese ripening. Abstract 559
Bacteriolysins in gonococcal arthritis. Abstract 34
Bacteriophage against *Shigella paradysenteriae*, Flexner, in an outbreak of dysentery in *Macacus rhesus* monkeys. Abstract 203
Bacteriophagic service in septic conditions. Abstract 642
